

Making plans, preparing and looking forward

Spring forward

Slipping in between the blustery showers and glistening frosts,
spring surprises us
with shafts of sunlight reflecting off shoots of new growth.

Moving through March

we are awakened from hibernation by new hope,
our thoughts turn to planning and planting,
and our days become a patchwork of colour
like colourful packets of seeds scattered on a table.

From winter we move into Spring,
from waiting we move to doing,
and as plans are made we begin the journey into a new tomorrow,
a partially drawn canvas with the promise of the familiar
but blank patches awaiting new opportunities and exciting discoveries.

Life with God is a journey
and spring invites us to pick up the pace
as we move forward
in love with life, and in love of life.
